# WASTE, GARBAGE, RECYCLABLE

Everything for the garbage can – but for which one?

ENGL

## HANAU? KEEP IT CLEAN!

Dear Hanau residents,

A liveable planet and a clean city are of concern to all of us. And together we can do our part on a daily basis.

We have a wide range of disposal and recycling options in Hanau. From waste bins and green waste collection points to recycling centres. This flyer explains which waste belongs where, and where our disposal centres are located.

Many items that end up in the bin are not waste, but valuable materials that can be recycled. It is important to separate them.

Waste separation is best learnt as a child. Explain to your children which waste belongs in which bin, and be a role model.

Please join in and separate your rubbish - for the environment, for Hanau, and for our children's future.

Questions on all topics related to waste and disposal?

Waste consulting:

## WASTE PAPER

### WHAT GOES IN THE BLUE GARBAGE CAN?

- Waste and packaging made of paper, cardboard or carton
- Emptying blue garbage can every four weeks
- Save space by tearing and folding
- No food residues adhering
- Cardboard boxes etc. placed next to the garbage can will not be taken away
- Use public paper containers for short-term additional demand

## SALES PACKAGING

### WHAT GOES IN THE YELLOW GARBAGE CAN?

- Only empty packaging made of aluminium, tinplate, plastic, and composite materials
- Emptying yellow garbage can every four weeks
- Empty the remaining packaging, rinsing is not necessary. Separate all components, do not stack them into each other
- Use yellow bags for short-term additional demand

## BIO WASTE

### WHAT GOES INTO THE BROWN GARBAGE CAN?

- Compostable organic waste
- Emptying brown garbage can every two weeks
- Bind moisture in the garbage can using newspaper, kitchen paper or paper bio bags
- No plastic bags in the organic waste garbage can – not even „compostable“ ones!

**NO**  
Plastic bags in the organic waste bin - and no "compostable" either!

## RESIDUAL WASTE

### WHAT GOES IN THE BLACK GARBAGE CAN?

- Waste that cannot be sorted into the other three garbage cans
- Emptying black garbage can weekly or 2-weekly
- Electrical appliances, pollutants, liquid waste, and anything for which there is a waste take-back system do not belong in the residual waste bin!
